Stream Cleaner Environmental Forum #8. Stakeholders

http://www.cacaponinstitute.org/high.htm

1.		of the following is a GROWING source of non-point source pollutions? Agriculture b) Urban development
2.		ce non-point source pollution most Tributary Strategies rely on mandatory guidelines. Circle the correct answer: True False
		ng to the West Virginia Tributary Strategy chapter on Challenges to Implementation, list two f the WV Agricultural Subcommittee.
	a.	
	b.	
	uestions erspectiv	s 4 – 7 refer to Native Guide Matt Monroe's essay on the WV Agricultural
	4. Why	y is it difficult to convince West Virginians that restoring the Bay is important for WV?
		WV is a long way from the Bay Most West Virginians have probably only visited the Bay or places like Baltimore's Inner Harbor a few times, if ever.
		People felt that West Virginia's streams were already high quality.
		West Virginia's nutrient contributions to the Bay are small compared to other states. All of the above.
		None of the above.
	5. In V	West Virginia alone the expected Bay clean up cost to the agricultural community is expected ed
		\$100,000
	•	\$500,000 \$1 Million
		\$100 Million
	e)	\$200 Million
		ming is now more efficient and many farmers suggest the best way to reduce non-point source on is to reduce the amount of land in production. Circle the correct answer: True False
	7. List	two BMPs that have been done in West Virginia. a
		b
8.	According	ng to the Chesapeake Bay Foundation, the interests of the Bay (like fisheries) and agricultural

- от лесотату то тне спезареаке вау Foundation, the interests of the Bay (like fisheries) and agricultural interests are linked.......
 - a) but disconnected
 - b) only where farms have streams
 - c) only where farms are on the Bay's shore
 - d) strongly
